## EXPERIENCE

### Legend Has It

Prague, Czech Republic

Full Stack Engineer | AI Engineer

2022 - 2023

- Primary developer for the AI gRPC backend used by the game to power the NPCs.
- The NPCs had a dynamically updating internal needs system and emotional state powered by knowledge graphs that they used to achieve their task goals and move autonomously in the game world.
- Every NPC had a conversation module where they would talk about different topics depending on their internal needstate. Worked on autonomous NPC-NPC conversation as well. Design and development of Knowledge Graphs for intelligent autonomous NPCs. (Neo4J/Cypher/Golang).
- Developed a frontend web app via ReactTS, Vue to interact with gRPC backend to configure API settings to allow non-technical users to interact with our AI.
- Created GraphQL based API for NPC decision making & decision prompts (TS + NodeJS) to add to our microservice network of NPC autonomy.

## PROJECTS

### sahilll.dev

2025

Built with Next.js and Tailwind CSS, hosted on Vercel. Includes a blog (built with Astro) and a "Chat with AI" feature powered by Google Generative AI and Vercel AI SDK.

### MidJProxy

2022-2023

Built a Vue.js frontend and GraphQL backend with a Discord bot to funnel and proxy image results from the MidJourney bot via API.

### HornStat

2022-2022

Developed a feature-rich Discord bot, a GraphQL-based queueing server for Brawlhalla with real-time updates, and a data pipeline for analytics from third-party APIs.

### SeedMaster

2022

Created a Node.js CLI tool to auto-seed tournament attendees based on in-game ratings, reducing hours of work to seconds.

### ClanRank

2021

Developed an Electron desktop app to manage team match history, seasonal leaderboards, and scores for league events.

## EDUCATION

### Bachelor of Computer Applications

2022 - 2026

Manipal University

Jaipur, India

## CERTIFICATIONS

### AWS Certified Solutions Architect - Associate

Feb 2025
